EDUCATION

Sai Gon University   2021-Now
Software Engineer   *Current GPA: 2.78/4.0*

SKILLS

Languages: C/C++, Python, Java, HTML/CSS, JavaScript, PHP, SQL
Tools: Git/GitHub, Docker, VS Code, IntelliJ IDEA, Eclipse, NetBeans IDE, MSSQL, MySQL

PROJECTS

Laptop E-commerce Website / *HTML, CSS, JS, PHP, Git, MySQL, Visual Studio*   Jan. 2024

- Developed a laptop e-commerce website.

- Managed source code with GitHub for collaboration and version control.

- This project provided opportunities to learn about e-commerce and web programming languages.

Textbook Management System/ *JavaSwing, Maven, Git, MSSQL, NetBeans IDE*   Aug. 2022

- Built a desktop application using Java Swing and NetBeans IDE to manage textbook inventory.

- Used MSSQL as the database to store information about textbooks and inventory.

- Managed source code with GitHub for tracking and version management.

- This project provided opportunities to learn about object-oriented programming and database management.

Mini Supermarket Management System/ *JavaSwing, Maven, Git, MySQL, IntelliJ IDEA*   Nov. 2023

- Developed a desktop application using Java Swing and IntelliJ IDEA to manage a mini supermarket.

- Employed MySQL as the database to store information about products, inventory, and invoices.

- Managed source code with GitHub for version control and collaboration.

- This project provided opportunities to learn about object-oriented analysis and design, as well as database management in a commercial context.
